These features facilitate and improve the ability of our channel partners to provide support and to drive sales.

Basis of Presentation of Interim Periods

The interim condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States, or GAAP, for interim financial information and with the instructions to Securities and Exchange Commission, or SEC, Form 10-Q and Article 10 of SEC Regulation S-X. They do not include all the information and footnotes required by GAAP for complete financial statements. Therefore, these financial statements should be read in conjunction with our audited consolidated financial statements and notes thereto for the year ended December 31, 2017, included in our 2017 Annual Report on Form 10-K filed with the SEC on March 30, 2018, referred to as our 2017 Annual Report.

The interim condensed consolidated financial statements included herein are unaudited; however, they contain all normal recurring accruals and adjustments that, in the opinion of management, are necessary to present fairly our results of operations and financial position for the interim periods. The results of operations for the three months ended March 31, 2018 are not necessarily indicative of the results to be expected for future quarters or the full year.

For a complete summary of our significant accounting policies, please refer to Note 1, “Business and Summary of Significant Accounting Policies,” of our 2017 Annual Report. There have been no material changes to our significant accounting policies during the three months ended March 31, 2018.

Use of Estimates

The preparation of the accompanying consolidated financial statements conforms with accounting principles generally accepted in the U.S. and requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Significant areas of estimates include revenue recognition, intangible assets, bad debt allowance, valuation of financial instruments, useful lives of long lived assets and share-based compensation. Actual results may differ from these estimates under different assumptions or conditions.

Reclassification

Certain reclassifications have been made to the Company's consolidated financial statements for the prior years to conform to the current year presentation. Such reclassifications had no impact on net loss or net cash flows.

Recently Issued Accounting Standards

In May 2014, the FASB issued Accounting Standards Update No. 2014-09 (Topic 606) "Revenue from Contracts with Customers." Topic 606 supersedes the revenue recognition requirements in Topic 605 "Revenue Recognition" (Topic 605), and requires entities to recognize revenue when control of the promised goods or services is transferred to customers at an amount that reflects the consideration to which the entity expects to be entitled to in exchange for those goods or services. We adopted Topic 606 as of January 1, 2018 using the modified retrospective transition method. See Note 8 for further details.

Note 4. Fair Value Measurements

In accordance with Accounting Standards Update 820, Fair Value Measurement (“ASC 820”), the Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability (i.e., the exit price) in an orderly transaction between market participants at the measurement date. ASC 820 establishes a fair value hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available.

Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company’s assumptions about the inputs that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The fair value hierarchy is categorized into three levels based on the inputs as follows:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level 2 – Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these financial instruments include cash instruments for which quoted prices are available but are traded less frequently, derivative instruments whose fair values have been derived using a model where inputs to the model are directly observable in the market and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level 3 – Instruments that have little to no pricing observability as of the reported date. These financial instruments are measured using management’s best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

There were no transfers in or out of level 3 during the three months ended March 31, 2018.

The degree of judgment exercised by the Company in determining fair value is greatest for securities categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined by the lowest level input that is significant to the fair value measurement.

The following table summarizes fair value measurements by level as of March 31, 2018 for and the Company’s liabilities measured at fair value on a recurring basis:

	March 31, 2018			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Derivative Liabilities				
Conversion feature	\$ -	\$ -	\$ 1,706,485	\$ 1,706,485
Warrant Liabilities	-	-	204,896	204,896
Total Derivatives Liabilities	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 1,911,381</u>	<u>\$ 1,911,381</u>

The Company used the Monte Carlo valuation model to determine the value of the outstanding warrants and conversion feature from the “Offering”. Since the Monte Carlo valuation model requires special software and expertise to model the assumptions to be used, the Company hired a third party valuation expert.

Note 5. Stockholders’ Equity

(A) Common Stock

The Company is presently authorized to issue 500,000,000 shares common stock. The Company had 51,046,394 shares of common stock issued and outstanding as of March 31, 2018, an increase of 4,429,301 shares from December 31, 2017, largely due to warrant exercises.

The number of warrants outstanding at March 31, 2018 (unaudited) and December 31, 2017 have been recorded and classified as equity is 13,195,528 and 18,039,312 respectively. Note 9. Revenues

Adoption of ASC Topic 606, "Revenue from Contracts with Customers"

On January 1, 2018, we adopted Topic 606 using the modified retrospective method applied to those contracts which were not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with our historic accounting under Topic 605.

We recorded a net increase to opening retained earnings of \$107,520 as of January 1, 2018 due to the cumulative impact of adopting Topic 606, with the impact primarily related to our installation revenues that were previously deferred for which the performance obligation was determined to be complete as of the date of adoption. The impact to revenues to be recognized for the quarter ended March 31, 2018 was a decrease of \$107,520 as a result of applying Topic 606, relating to the aforementioned installation revenues and an increase to the accumulated deficit.

The impact to previously reported net billings in excess of revenue as a result of ASC Topic 606 is as follows:

	As of December 31, 2017	
	Reported	Adjusted
Net billings in excess of revenue	\$ 242,986	\$ 135,466
Total revenues	<u>\$ 13,547,507</u>	<u>\$ 13,547,507</u>

Revenue Recognition

Our revenues represent amounts earned for our mobile and security solutions. Our solutions take many forms but our revenue generally consists of fixed and/or variable charges for services delivered monthly under a combined services and SaaS model. We also offer discrete (one-time) services for implementation and for development of specific functionality to properly service our customers.

The following table presents our revenues disaggregated by revenue source:

	Three Months Ended March 31,	
	2018	2017 ⁽¹⁾
Monthly Service	\$ 3,291,882	\$ 2,637,827
Installation and Software Development	820,688	157,116
Total revenues	<u>\$ 4,112,570</u>	<u>\$ 2,794,943</u>

(1) As noted above, prior period amounts have not been adjusted under the modified retrospective method.

Monthly services revenues are recognized at a point in time and amounted to \$3,291,882 for the period ended March 31, 2018. Installation and software development revenues are recognized over time and amounted to \$820,688 for the period ended March 31, 2018.

The following table presents our revenues disaggregated by geography, based on the billing addresses of our customers

	Three Months Ended March 31,	
	2018	2017 ⁽¹⁾
Europe	\$ 3,391,882	\$ 2,713,191
Other geographic areas	720,688	81,752
Total revenues	<u>\$ 4,112,570</u>	<u>\$ 2,794,943</u>

(1) As noted above, prior period amounts have not been adjusted under the modified retrospective method.

Monthly Service Revenues

The Company's performance obligations in a monthly SaaS and service offerings are simultaneously received and consumed by the customer and therefore, are recognized over time. For recognition purposes, we do not unbundle such services into separate performance obligations as their pattern of transfer does not differ. The Company typically bills its customer at the end of each month, with payment to be received shortly thereafter. The fees charged may include a combination of fixed and variable charges with the variable charges tied to the number of subscribers or some other measure of volume. Although the consideration may be variable, the volumes are easily estimable at the time of billing, with "true-up" adjustments occurring in the subsequent month. As such adjustments have not historically been material, no amounts of variable consideration are subject to constraint.

Installation and Software Development Revenues

The Company's other revenues consist generally of installation and development projects.

Installation represents the activities necessary for a customer to obtain access and connectivity to the Company's monthly SaaS and service offerings. While installation may require separate phases, it represents one promise within the context of the contract.

Development consists of programming and other services to add new, additional or customized functionality to a customer's existing service offerings. Each development activity is typically its own performance obligation.

Revenue is recognized over time if the installation and development activities create an asset that has no alternative use for which the Company is entitled to receive payment for performance completed to date. If not, then revenue is not recognized until the applicable performance obligation is satisfied.

Arrangements with Multiple Performance Obligations

The Company's contracts with customers may include multiple performance obligations. For such arrangements, the Company allocates revenue to each performance obligation based on its relative standalone selling price. The Company generally determines standalone selling prices based on the prices charged to customers.

Net Billings in Excess of Revenues

The Company records net billings in excess of revenues when payments are made or due in advance of our performance, including amounts which are refundable. The increase in net billings in excess of revenues of \$73,054 for the three months ended March 31, 2018 is primarily driven by an increase in invoices due in advance of satisfying our performance obligations which was \$316,040 as of March 31, 2018 compared to \$242,986 for December 31, 2017.

Payment terms vary by the type and location of our customer and the products or services offered. The term between invoicing and when payment is due is not significant. For certain products or services and customer types, payment is required before the products or services are delivered to the customer.

Contract Assets

Given the nature of the Company's services and contracts, it has no contract assets.

Note 10. Subsequent Events

On May 8, 2018, the Company entered into a software license agreement with iPass Inc. In exchange for perpetual access to certain licensed software for up to 25,000,000 authorized devices, the Company shall pay iPass Inc. a software license fee of \$3,000,000 (which includes the first year annual maintenance fee of 20%). The gross proceeds to the Company from the Offering, before deducting the Company's estimated offering expenses, are expected to be approximately \$6,100,000. On May 11, 2018, the Company closed on its previously announced public offering of common stock gross proceeds of \$6,100,000. The public offering was a shelf takedown off of our registration statement on Form S-3 (File No. 333-213575). The offering was conducted pursuant to a securities purchase agreement (the "Purchase Agreement"), with select accredited investors, and a placement agency agreement (the "Placement Agreement"), between the Company and Dawson James Securities, Inc., the placement agent on a best-efforts basis with respect to the offerings (the "Placement Agent"), that were entered into on May 9, 2018. The Company sold 2,440,000 shares of common stock at a purchase price of \$2.50 per share. The vast majority of our platform is comprised of our own development software, which provides our customers with a great deal of flexibility in how they use our products now and in the future and allows us to be market driven in our future. Various patents we have applied for and been granted form the basis of work processes critical to our platform solution. Our platform services partners (technologies integrated into our cloud) include: HPE, IBM, Sonus, Oracle, Microsoft, NetNumber, Affirmed and other world class technology providers.

Pareteum is a mission focused company empowering every person and every “thing” to be globally connected – **ANY DEVICE, ANY NETWORK, ANYWHERE**™. These sectors need Communications-as-a-Service (CaaS), which Pareteum delivers. Our solutions have received industry acclaim.

At Pareteum, our mission is to create an easily accessible open mobility system for the world. We believe that open software and interfaces for mobility and applications will create more innovation, economic freedom, and opportunity equality worldwide, just like the internet did for information.

Pareteum has developed a **Communications Cloud Services Platform**, providing (i) Mobility, (ii) Messaging and (iii) Security services and applications, with a Single-Sign-On, API and software development suite.

Our solution has proven itself globally against much larger competitors and is installed in multiple companies in diverse countries around the world ranging from small service providers to one of the world’s largest telecoms companies, Vodafone, based in Europe. We had more than 2.22 million active connections on our platforms as of March 31, 2018.

The market and our customers tell us that they need to find ways to reduce cost, they want to find ways to increase their revenues, and they want to scale and grow their business, and all consider Cloud capabilities as a vital means to achieve these goals. As we’ve listened to our customers and understood the business goals that they have, we believe Pareteum is well placed to help them achieve these goals, drive value for customers, and ultimately value for our own business.

We have designed a solution that solves these problems. Each of these **three platforms - mobility, messaging and security** - can be marketed and deployed independently, or they can be delivered as a single, integrated Cloud Service Platform, as illustrated in the figure above.

The Pareteum platform hosts integrated IT/Back Office and Core Network functionality for mobile network operators, and for enterprises implement and leverage mobile communications solutions on a fully outsourced SaaS, PaaS and/or IaaS basis: made available either as an on-premise solution or as a fully hosted service in the Cloud depending on the needs of our customers. Pareteum also delivers an Operational Support System (“OSS”) for channel partners, with Application Program Interfaces (“APIs”) for integration with third party systems, workflows for complex application orchestration, customer support with branded portals and plug-ins for a multitude of other applications. These features facilitate and improve the ability of our channel partners to provide support and to drive sales.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our financial statements and notes thereto and the other financial information included elsewhere in this report.

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with U.S. generally accepted accounting principles, or GAAP, requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of net revenue and expenses in the reporting period. We regularly evaluate our estimates and assumptions related to revenue recognition, rebates, allowances for doubtful accounts, sales returns and allowances, warranty reserves, inventory reserves, stock-based compensation expense, long-lived asset valuations, strategic investments, deferred income tax asset valuation allowances, uncertain tax positions, tax contingencies, self-insurance, restructuring costs, litigation and other loss contingencies. We base our estimates and assumptions on current facts, historical experience and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the recording of revenue, costs and expenses that are not readily apparent from other sources. The actual results experienced by us may differ materially and adversely from our estimates. To the extent there are material differences between our estimates and the actual results, our future results of operations will be affected. For a description of our critical accounting policies and estimates, please refer to the “Critical Accounting Policies and Estimates” section in Part II, Item 7, “Management’s Discussion and Analysis of Financial Condition and Results of Operations” of our 2017 Annual Report. There have been no material changes in any of our critical accounting policies and estimates during the three months ended March 31, 2018.

Financing activities

Net cash provided by financing activities for the three months ended March 31, 2018 and 2017 was \$2,525,037 and \$1,631,274, respectively, an increase of \$893,763 or 55%. This increase was due to warrant exercises and the absence of principal repayments on senior secured debt that was paid off in December of 2017.

Effect of exchange rates on cash and cash equivalents

Effect of exchange rates on cash and cash equivalents for the three-month period ended March 31, 2018 was \$131,111, compared to \$221,306 for the same period in 2017.

As a result of the above activities, for the three months ended March 31, 2018, we had cash, cash equivalents and restricted cash of \$15,988,645, a net increase in cash and cash equivalents of \$2,250,970 since December 31, 2017.

Off- Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have either a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors, nor we have any relationships with unconsolidated organizations or financial partnerships, such as structured finance or special purpose entities that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Item 3. Quantitative and Qualitative Disclosure about Market Risks

Foreign currency exchange rate

Although the majority of our business activities are carried out in Euros, we report its financial statements in USD. The conversion of Euros and USD leads to period-to-period fluctuations in our reported USD results arising from changes in the exchange rate between the USD and the Euro. Generally, when the USD strengthens relative to the Euro, it has an unfavorable impact on our reported revenue and income and a favorable impact on our reported expenses. Conversely, when the USD weakens relative to the Euro, it produces a favorable impact on our reported revenue and income, and an unfavorable impact on our reported expenses. The above fluctuations in the USD/Euro exchange rate therefore result in currency translation effects (not to be confused with real currency exchange effects), which impact our reported USD results and may make it difficult to determine actual increases and decreases in our revenue and expenses which are attributable to our actual operating activities. We carry out our business activities primarily in Euros, and we do not currently engage in hedging activities. As the clear majority of our business activities are carried out in Euros and we report our financial statements in USD, fluctuations in foreign currencies impact the total amount of assets and liabilities that we report for our foreign subsidiaries upon the translation of those amounts in USD. We do not believe that we have currently material exposure to interest rate or other market risk.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of March 31, 2018, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Principal Executive Officer and Principal Financial and Accounting Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. Based on the evaluation, the Company's Principal Executive Officer and Principal Accounting Officer have concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and is accumulated and communicated to our management as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

On January 1, 2018, the Company adopted ASC Topic 606, "Revenue from Contracts with Customers" and other than this change and related update to the Company's internal controls, there have been no additional changes in the Company's internal control over financial reporting that occurred during the Company's fiscal quarter ended March 31, 2018 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Nevertheless, from time to time, the Company may be subject to legal actions and claims in the ordinary course of business. We have previously received, and may in the future continue to receive, claims from third parties asserting, among other things, infringement of their intellectual property rights. The results of any current or future litigation cannot be predicted with certainty, and regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources, and other factors.

Item 1A. Risk Factors

In addition to the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the Risk Factors included in Part I, Item 1A. — "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2017. This Software License Agreement (this "**Agreement**"), effective as of May 8, 2018 (the "**Effective Date**"), is by and between **iPass Inc.**, a Delaware corporation with offices located at 3800 Bridge Parkway, Redwood Shores, CA 94065 ("**Licensor**") and **Pareteum Corporation**, a Delaware corporation, with offices located at 1185 Avenue of the Americas, New York, NY 10036 ("**Licensee**"). Licensor and Licensee may be referred to herein collectively as the "**Parties**" or individually as a "**Party**."

WHEREAS, Licensor desires to license the Software described in **Exhibit A** attached hereto to Licensee; and

WHEREAS, Licensee desires to obtain a license to use the Software for its internal business purposes, subject to the terms and conditions of this Agreement.

NOW, THEREFORE, in consideration of the mutual covenants, terms, and conditions set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

1. **Definitions.**

(a) "**Authorized Devices**" means an Android or iOS device which Licensee permits to access and use the Software and/or Documentation pursuant to Licensee's license hereunder.

(b) "**Documentation**" means Licensor's user manuals, handbooks, and installation guides relating to the Software provided by Licensor to Licensee electronically.

(c) "**Software**" means the product described in **Exhibit A**, including any Updates provided to Licensee pursuant to this Agreement.

(d) "**Updates**" means any updates, bug fixes, patches, or other error corrections to the Software that Licensor generally makes available free of charge to all licensees of the Software.

2. **License.**

(a) **License Grant.** Subject to and conditioned on Licensee's payment of Fees and compliance with all other terms and conditions of this Agreement, Licensor hereby grants Licensee a perpetual, non-exclusive, and non-transferable (except in compliance with Section 12(g)) license during the Term to: (i) access and otherwise use the Licensed Software, solely in furtherance of this Agreement and not for other internal business purposes; (ii) sell or re-license the Licensed Software and Documentation to any third party; and (iii) use and make a reasonable number of copies of the Documentation solely for Licensee's internal business purposes in connection with Licensee's use of the Software. The total number of Authorized Devices will not exceed the number set forth in **Exhibit B**, except as expressly agreed to in writing by the Parties and subject to any appropriate adjustment of the license fees payable hereunder. Licensee may make and use a reasonable number of copies of the Software solely for internal, non-revenue generating purposes, such as back-up, disaster recovery, and testing purposes. Any such copy of the Software: (i) remains Licensor's exclusive property; (ii) is subject to the terms and conditions of this Agreement; and (iii) must include all copyright or other proprietary rights notices contained in the original.

(b) **Use Restrictions.** Licensee shall not use the Software or Documentation for any purposes beyond the scope of the license granted in this Agreement. Without limiting the foregoing and except as otherwise expressly set forth in this Agreement, Licensee shall not at any time, directly or indirectly: (i) copy, modify, or create derivative works of the Software or the Documentation, in whole or in part; (ii) except to the extent set forth above in Section 2(a), rent, lease, lend, sell, sublicense, assign, distribute, publish, transfer, or otherwise make available the Software or the Documentation; (iii) knowingly reverse engineer, disassemble, decompile, decode, adapt, or otherwise attempt to derive or gain access to the source code of the Software, in whole or in part; (iv) remove any proprietary notices from the Software or the Documentation; or (v) use the Software in any manner or for any purpose that knowingly infringes, misappropriates, or otherwise violates any intellectual property right or other right of any person, or that violates any applicable law.

(c) **Reservation of Rights.** Licensor reserves all rights not expressly granted to Licensee in this Agreement. Except for the limited rights and licenses expressly granted under this Agreement, nothing in this Agreement grants, by implication, waiver, estoppel, or otherwise, to Licensee or any third party any intellectual property rights or other right, title, or interest in or to the Software.

(d) **Delivery.** Licensor shall deliver the Software electronically to Licensee following the Effective Date.

(e) **Escrow of Source Code.** The Parties will enter into an escrow agreement with an escrow agent agreed by the Parties in relation to the source code together with all developer notes associated with the Licensed Software and Documentation until such time as: (i) the Licensor reports \$10,000,000 of cash on the balance sheet in a publicly filed document; OR (ii) December 31, 2018, whichever occurs first.

3. Licensee Responsibilities.

(a) **General.** Licensee is responsible and liable for all uses of the Software and Documentation resulting from access provided by Licensee, directly or indirectly, whether such access or use is permitted by or in violation of this Agreement. Licensee shall take commercially reasonable efforts to make all users of Authorized Devices aware of this Agreement's provisions as applicable to such users of Authorized Devices and their use of the Software, and shall cause users of Authorized Devices to comply with such provisions.

(b) **Support.** Licensor shall provide Licensee with the support services described on **Exhibit B** for one year following the Effective Date and thereafter, solely if Licensee purchases additional support services. Licensor shall continue to provide support services as described on **Exhibit B**, the year following the one-year anniversary of the Effective Date, and every year thereafter, upon payment of the annual maintenance fee as provided in **Exhibit B**.

4. Fees and Payment.

(a) **Fees.** Licensee shall pay Licensor the software licensing fees ("**Software License Fee**") and annual maintenance fee ("**Annual Maintenance Fee**") (collectively, Software License Fee and Annual Maintenance Fee are "**Fees**"), set forth in **Exhibit B** without offset or deduction. Licensee shall make all undisputed payments hereunder in US dollars and are due and payable within thirty (30) days after the date of invoice. If Licensee fails to make any undisputed payment when due, Licensor shall provide written notice and thereafter, and in addition to all other remedies that may be available: (i) Licensor may charge interest on the past due amount at the rate of 1.5% per month calculated daily and compounded monthly or, if lower, the highest rate permitted under applicable law; and (ii) Licensee shall reimburse Licensor for all costs incurred by Licensor in collecting any late payments or interest, including attorneys' fees, court costs, and collection agency fees; and (iii) if such failure continues for 10 days following written notice thereof, Licensor may prohibit access to the Software until all past due amounts (but expressly excluding any such amounts disputed in good faith) and interest thereon have been paid, without incurring any obligation or liability to Licensee or any other person by reason of such prohibition of access to the Software.

(b) **Taxes.** All Fees and other amounts payable by Licensee under this Agreement are exclusive of taxes and similar assessments. Licensee is responsible for all sales, use, and excise taxes, and any other similar taxes, duties, and charges of any kind imposed by any federal, state, or local governmental or regulatory authority on any amounts payable by Licensee hereunder, other than any taxes imposed on Licensor's income.

(c) **Auditing Rights and Required Records.** Licensee agrees to maintain complete and accurate records in accordance with generally accepted accounting principles during the Term and for a period of three years after the termination or expiration of this Agreement with respect to matters necessary for accurately determining amounts due hereunder. Not more than one (1) time during any twelve (12) consecutive calendar month period, Licensor may, at its own expense and at Licensee's principal place of business during Licensee's normal business hours, on not less than thirty (30) days' prior notice, inspect and audit Licensee's records with respect to matters covered by this Agreement, provided that if such inspection and audit reveals that Licensee has underpaid Licensor by more than five percent (5%) with respect to any amounts due and payable during the Term, Licensee shall promptly pay the amounts necessary to rectify such underpayment, together with interest in accordance with Section 4(a). Licensee shall pay for the costs of the audit if the audit determines that Licensee's underpayment equals or exceeds 15% for any quarter. Such inspection and auditing rights will extend throughout the Term of this Agreement and continue for a period of six (6) months after the termination or expiration of this Agreement.

5. **Confidential Information.** From time to time during the Term, either Party may disclose or make available to the other Party information about its business affairs, products, confidential intellectual property, trade secrets, third-party confidential information, and other sensitive or proprietary information, whether orally or in written, electronic, or other form or media/in written or electronic form or media, whether or not marked, designated or otherwise identified as "confidential" (collectively, "**Confidential Information**"). The receiving Party shall not disclose the disclosing Party's Confidential Information to any person or entity, except to the receiving Party's employees who have a need to know the Confidential Information for the receiving Party to exercise its rights or perform its obligations hereunder. Notwithstanding the foregoing, each Party may disclose Confidential Information to the limited extent required (i) in order to comply with the order of a court or other governmental body, or as otherwise necessary to comply with applicable law, provided that the Party making the disclosure pursuant to the order shall first have given written notice to the other Party and made a reasonable effort to obtain a protective order; or (ii) to establish a Party's rights under this Agreement, including to make required court filings. On the expiration or termination of the Agreement, the receiving Party shall promptly return to the disclosing Party all copies, whether in written, electronic, or other form or media, of the disclosing Party's Confidential Information, or destroy all such copies and certify in writing to the disclosing Party that such Confidential Information has been destroyed. Each Party's obligations of non-disclosure with regard to Confidential Information are effective as of the Effective Date and will expire two (2) years from the date first disclosed to the receiving Party; provided, however, with respect to any Confidential Information that constitutes a trade secret (as determined under applicable law), such obligations of non-disclosure will survive the termination or expiration of this Agreement for as long as such Confidential Information remains subject to trade secret protection under applicable law.

6. **Intellectual Property Ownership; Feedback.**

(ii) If such a claim is made or appears possible, Licensee agrees to permit Licensor, at Licensor's sole discretion, to (A) modify or replace the Software or Documentation, or component or part thereof, to make it non-infringing, or (B) obtain the right for Licensee to continue use. If Licensor determines that none of these alternatives is reasonably available, Licensor may terminate this Agreement, in its entirety or with respect to the affected component or part, effective immediately on written notice to Licensee.

(b) **Termination.** In addition to any other express termination right set forth in this Agreement:

(i) Licensor may terminate this Agreement, effective on written notice to Licensee, if Licensee: (A) fails to pay any undisputed amount when due hereunder, and such failure continues more than 30 days after Licensor's delivery of written notice thereof; or (B) breaches any of its obligations under Section 2(b) or Section 5;

No expiration or termination will affect Licensee's obligation to pay all Fees that may have become due before such expiration or termination, or entitle Licensee to any refund. If termination is resultant from events under 11(b)(iii) on the part of Licensor, the Licensee will have recourse under section 2(e) Escrow Source Code.

iPass SmartConnect Description

iPass SmartConnect technology is delivered to Authorized Devices through a cloud-based platform (the “Platform”) comprising software elements on the mobile device and available over the Internet. iPass’ Platform gives control over the definition and management of mobility services configured to the Licensee’s specific needs. This architecture gives an Authorized Device choice in access services and serves as a bridge to functionality through use of extensible web services standards, while keeping the operational and financial burden on Licensee low by not requiring them to purchase, deploy and manage on-premises infrastructure, unless they so choose for purposes of adding additional functionality.

iPass Platform is designed to provide Licensee with reliability, flexibility, network security, policy enforcement, consolidated billing and scalability.

The technology consists of the following principal components:

- i. **Foundation Services.** Provide the basic capabilities needed for a cloud-based platform, including the ability to manage devices (add, remove, or change rights), authenticate devices to access the platform, authorize access to particular functions, or track and audit use of the platform.
- ii. **Operational Services.** Are built on top of the iPass Foundation Services platform, enabling Licensee to operate the various iPass’ market-facing offers, including device profile/configuration management, network directory management, account management, order management, usage management, support, billing and training.
- iii. **Presentation Services.** Impact how information is presented to devices accessing the Platform, usually through a web based portal. Presentation Services include web presentation, data validation, access control (controlling who can see and enter what).
- iv. **SmartConnect Client and SmartConnect SDK Services.** Provide the ability to update configuration files and associated network registries, and to receive the data that the client collects.
- v. **Curation Services.** Ability of iPass platform to collect information about Open Networks and be able to decode the hotspot information and automate steps to connect to that Network.
- vi. **High-Availability and Scalable Authentication Architecture.** iPass’ relationships with network service providers enables iPass Platform to enable connectivity through multiple global networks . As a result, the cloud-based Platform reduces the risk of service interruptions associated with depending on only one service provider. Furthermore, iPass’ geographically distributed transaction centers act as a unified and fault-tolerant system that provides scalable and highly available device authentication and quality management information collection. Each point in the authentication process is designed with built-in redundancy and fail-over capabilities.

iPass SmartConnect SDK – necessary for adding iPass services to an application. The SDK may be used to integrate iPass functionalities into a specific application offered by a third-party application, and supports the following operating systems: Android and iOS.

iPass SmartConnect Client – iPass functional applications built on iPass SmartConnect SDK and supporting the following operating systems: Android and iOS.

iPass Curated Network – Curated Networks are open Networks that have been added to footprint using iPass Curation Services and can be accessed via the iPass SmartConnect software.
