

Work location: Spain, remote work
Starting date: Immediate

Pareteum Corporation (OTC: TEUM), a rapidly growing global cloud software communications platform company with a mission to connect "every person and every(thing)", with activity in Europe, the Middle-East and the Americas, is looking for,

BSS/OSS Java Developer

If you are an engineer, a developer, an analyst, a programmer or other professional who's day-2-day involved in Java developments and is used to handle working in a professional and fast-moving telecommunications environment: **this is the best opportunity to develop your international career.**

You will be accountable for developing Java systems and writing applications to interface with other internal and 3rd party systems, telecom network elements, SQL and No-SQL databases, as well as design, writing and testing code.

Duties and Responsibilities

- Design and code communication processes between different systems of a telecom platform.
- Do re-engineering of current processes to optimize performance and/or maintainability.
- Develop solutions from design documentation that conform to the departments published patterns and practices.
- Contributing to technical documentation (for example design or developer guides).
- Take responsibility for project-based tasks focusing on any specific development stage.

Skills and Specifications

- A **minimum of 4 years** of related experience in Java developing.
- University degree or college diploma in **computer science or telecommunications**.
- Hands-on knowledge of Java Spring framework, particularly Sprint Batch, Spring Integration and Spring Data Flow Cloud knowledge.
- Experience on developing Unit Tests and performing TDD.
- MS SQL Server and Postgre SQL knowledge.
- Experience in transactional, distributed systems and multi-threaded applications.
- Experience in inter process communication and distributed systems.
- Solid understanding of Object-Oriented Analysis and Design fundamentals, and MVC.
- Experience with API and WS design and development over IIS: SOAP and JSON, RESTful interfaces.
- Experience with Hibernate is a plus. Knowledge of ORMs will be valued as well.
- Experienced working with Git as source version control (Gitlab).
- Experienced working with Atlassian Jira and Confluence a plus.
- Full knowledge of and adherence to SDLC (Software Development Life Cycle) standards and best practices.
- Strong problem solving skills.
- Good verbal, presentation, and written communications skills for all audiences
- Fluent in English; any additional mainstream language skills are advantageous.

Additional skills

- Hands-on experience on MongoDB is a valuable plus.
- Hands-on experience with Apache Camel and Apache Kafka a valuable plus.
- Hands on experience on Docker and Kubernetes deployments.
- Experience with design and development of gRPC interfaces a plus.
- Experience working with CI/CD tools a plus (TeamCity, Gitlab CI).
- Prior knowledge of mobile telecom networks, their standard and concepts is a big plus.
- Knowledge of Telecom market.
- Proficiency in advanced Microsoft Office (Word, Excel, MS-Project, Power Point, SharePoint).
- Cross-border work experience within an international company.

We will only be accepting applications from applicants currently resident within the European Union, with an unrestricted right to work in Spain.

Company Profile
