

21-19 Lead Developer Billing

Location: Spain (or remote within 2 time zone difference)

About this job:

Lead Developer- Billing will be responsible for developing our Pareteum MVNE platform, spanning telecom BSS/OSS, OCS systems and network elements. You will oversee a team of developers, operating under an established Agile framework, continuously collaborating with QA analysts and Product Owners. The platform itself is a legacy monolith in transition towards a set of micro-services deployed on Kubernetes clusters.

The successful candidate will work with people in multiple time zones, and therefore, is flexible on working hours.

What you'll do:

- Minimum of 5-year experience in software solution delivery, and solid C#/Java development experience
- Solid understanding of TCP/IP network architecture, with solid programming experience.
- NHibernate/Hibernate/Entity Framework experience.
- Experience with large volumes processing.
- Experience in transactional, distributed systems and multi-threaded applications.
- Solid understanding of Object-Oriented Analysis and Design fundamentals, and MVC.
- Experience with API development over IIS: SOAP and JSON.
- Good understanding of system development life cycle and quality assurance process.
- Familiar with SQL and in operating relational databases – Microsoft SQL Server and eventually Postgre SQL.
- Experience in DB design.

And also, nice to have

- Knowledgeable in Unix/Linux scripting (shell, Python, etc.).
- Experience with design and development of gRPC interfaces.
- Experience with Apache Kafka.
- Experience with MongoDB.
- Experience with micro-services architectures.
- Experience with containers (Docker).
- Experience with Kubernetes.
- Experience with cloud deployments, especially AWS.
- Experience with CI/CD tools (TeamCity, Gitlab CI).
- Experience with Node.js/TypeScript.
- Knowledge of Telecom market.
- TMForum eTOM and SID (Information Framework) models understanding.
- Experience with DDD (Domain-Driven Design).
- Experience with Atlassian Jira and Confluence.

About you:

- University degree in Computer Science or related fields preferably.
- The ideal candidate will have at least 5 years' experience in large IT systems operations and development, preferably in the Telecommunications BSS/OSS area
- Design and code communication processes between different systems of a telecom platform.
- Do re-engineering of current processes to optimize performance and/or maintainability.
- Develop solutions from design documentation that conform to the established processes and procedures.
- Contributing to technical documentation (for example design or developer guides)
- Lead a team of up to 6 developers, ensuring the quality of their deliverables (software, documentation, designs, etc.), and ensuring the set Software Development Life Cycle (SDLC) is followed.
- Ensure his team follows the dynamics and ceremony of the Pareteum Scrum.
- Support the Scrum Master/s.
- Perform code reviews and code merges.
- Deliver detailed designs.

Do you want this job, and do you have the required skills and experience?

Then we invite you to send your resume/cv and cover letter, both in English, to Recruiting@Pareteum.com. Please include the job number and title in the subject line of your email.
