

21-30 Quality Assurance Automation Engineer

Location: Spain (or remote within 2 time zone difference)

About this job:

Our QA Automation Engineer will be responsible for automating Quality Assurance tests for our customers, served by Pareteum MVNE platform, spanning telecom BSS/OSS, OCS systems and network elements. You will closely work with other QA engineers, product owners and developers, under an Agile process. Our goal is zero defect customer deployments. The successful candidate will work with people in multiple time zones, and therefore, is flexible on working hours.

What you'll do:

- Knowledge of XML, Web Services, REST.
- Knowledge of relational databases and SQL (Microsoft SQL Server).
- Experience with API test tools – Postman, SoapUI/ReadyAPI, etc.
- Experience with Test Automation tools and frameworks - Selenium, Cucumber, Robot Framework, Cypress etc.
- Experience in operating under Agile processes, Scrum or Kanban.
- Knowledgeable in Unix/Linux scripting (shell, Python, etc.).
- Familiar with SQL and relational databases – Oracle, Microsoft SQL Server, PostgreSQL.
- Familiar with MongoDB.
- Experience in DB design, both SQL and No-SQL.
- Solid understanding of TCP/IP network architecture, with solid programming experience.
- Support and perform installation, configuration and deployment of test automation tools, framework and automated test suites.
- Develop and maintain automated test suites.
- Test data preparation for manual and automatic executions.
- Reporting.
- Participate in troubleshooting and triaging of issues with different teams to drive towards root cause identification and resolution.

And also, nice to have

- Experience in working in Agile teams – Scrum and/or Kanban.
- Working in distributed teams, with team members located in different time zones.
- Knowledge of telecoms market and/or expertise within the fixed/broadband or mobile segments would be advantageous; experience in BSS/OSS systems and have an understanding of main business processes.
- Programming knowledge.
- Experience with Atlassian tools – Jira and Confluence.
- Experience with CI/CD tools – Jenkins, TeamCity, Gitlab CI, etc.
- Experience with automated deployment tools – Kustomize, ArgoCD, Helm.
- Experience in Event-Driven applications testing.
- Knowledge of gRPC.
- Knowledge of No-SQL databases (MongoDB).
- Testing Kubernetes hosted applications.

About you:

- 2 years minimum experience in Testing/Quality Assurance.
- Fluent oral and written communication skills in English ; the company internal communication language is English.
- Enjoy working in an international environment, welcome challenges, be both target oriented & self-motivated.
- Adhere to the defined Quality Assurance processes and procedures.
- Ensure timely delivery of results, in accordance to Release and Deployment planning.
- Continuous improvement on Quality Assurance processes and procedures.
- Proactive development of continuous integration / continuous delivery pipelines.
- Support continuous improvement of the overall Software Development Life Cycle.
- Participate in an Agile team, performing either under Scrum or Kanban.
- Support to deployments to production.

Do you want this job, and do you have the required skills and experience?

Then we invite you to send your resume/cv and cover letter, both in English, to Recruiting@Pareteum.com. Please include the job number and title in the subject line of your email.
